Introduction

Exposys Data Labs provides opportunities to students for virtual Internships. With a top ranking in the virtual Internships, Exposys Data Labs is sufficiently qualified to help students seeking online Internships. They help you throughout the Internship.

From 4 September to 4 October 2021, I worked in 'Exposys Data Labs' as Web Development Intern. And I have successfully completed this virtual Internship.

Description

My duties at Exposys Data Labs were to focus on given task and to complete it within given period of time which was one month. I have gone through various opportunities in this Internship. The company's objective is to give opportunities to students for various virtual Internships to ensure that they will gain maximum Industry oriented knowledge . Exposys Data Labs plays an important role in the industry by offering top services in virtual Internships, helping students who are seeking this opportunities to increase their knowledge.

I decided to Intern with the company because their objective was similar to the goal I am pursuing.

Learning

I learned how to use different programming languages to develop a website. I used different tools to gain knowledge throughout this Internship to complete this Internship. Although I was having enough time to complete task but due to college work It was difficult for me to complete task on time. I was having enough time and It was not fast-paced and It was challenging to complete all of my duties, I gained valuable experience, learned how to manage my time and how to organize work to maximize efficiency.

Ongoing Considerations

In one months with the Exposys Data Labs, I feel I was able to learn as much as I could. However, I would like to learn more about the web development , including how to build new different categories of websites and how to use them on live domain and hosting.

This internship experience was important in building my web development administration skills. I am grateful to have had the opportunity to get practical experience.
